Sai Vandhana T

+91 9345807901 saivandhanaxiib@gmail.com sai-vandhana-t-3954ba441 saivandhana901

Skills

- **Programming:** Python, Java, C
- **Frontend:** HTML, CSS
- **Backend:** Java, Spring Boot
- **Database:** MySQL
- **Core:** OOPs, DSA

Projects

Deepfake Video Detection System

- Developed an AI/ML-based system to detect manipulated and deepfake videos using neural-network techniques.
- Applied image/video preprocessing techniques to extract meaningful facial features for classification.
- Designed the system to provide the predicted class, prediction probabilities, and model performance metrics.
- **Technologies:** Python, Machine Learning, Neural Networks, OpenCV

Community Disaster Management System

- Designed a smart web/mobile application concept for disaster preparedness and emergency alerts.
- Proposed features for real-time alerts, emergency communication, and community-based disaster response.
- Focused on improving coordination and information sharing during natural disasters.
- **Technologies:** Python, HTML, CSS, AI/ML

Experiences

Academic / Project Experience

- Worked on AI/ML and software development projects as part of academic coursework and team-based activities.
- Applied programming, problem-solving, database, and object-oriented programming concepts to practical projects.

Achievements

- Secured **3rd place** in a quiz competition conducted by **NIIT**.

Education

B.E. in Artificial Intelligence & Machine Learning **2025–2029**
Vishweshraya Institute of Technology, Chikkamagaluru, Karnataka, India **CGPA: 9.31**
